SUMMARY

Information Technology undergraduate at the University of Kelaniya with hands-on experience across full-stack development, database systems, and applied programming, strengthened by IBM coursework in Python for Data Science, AI, and SQL. Seeking an internship in Data Science, Artificial Intelligence, or Machine Learning to apply strong problem-solving, data-handling, and software development skills to real-world projects.

SKILLS

Programming: Python | Java | C++

Data & Databases: SQL | MySQL | Database Management Systems (DBMS)

Development: Full-Stack Web Development | Back-End Development | Mobile Application Development

Areas of Interest: Data Science | Artificial Intelligence | Machine Learning

Soft Skills: Communication | Teamwork | Problem Solving | Time Management | Leadership

PROJECTS

Task Management System - Full-Stack Web Application (Apr 2026 - Jul 2026)

Built a full-stack web application for collaborative task management, supporting personal productivity tracking, team collaboration, and structured project workflows. Designed the database schema and back-end logic to manage task data.

ShipQuest - Multiplayer Mini-Game (C++)

Developed a console-based multiplayer game with player controls, scoring, lives, obstacle logic, custom data structures, and sorting algorithms for score tracking.

Event Management System (Java, MySQL)

Built a role-based event and ticket booking system using OOP and DAO; developed a Java Swing interface integrated with MySQL for venue capacity, dynamic pricing, and persistent data storage.

EDUCATION

BSc (Hons) in Information Technology (Reading) | 2025 - 2028

University of Kelaniya, Sri Lanka

ADDITIONAL INFORMATION

Languages: Tamil (Native) | English (Professional Working Proficiency) | Sinhala (Moderate Proficiency)

Certifications: Python for Data Science, AI & Development - IBM (Aug 2026) | Databases and SQL for Data Science with Python - IBM (Jun 2026) | Generative AI Chatbot Bootcamp - DevTown
